## Professional Summary

Frontend Developer with **3+ years of experience** delivering scalable, accessible, and high-performance web applications.

- Known for leading front-end delivery for multiple brand launches (**V-Guard, Tiber Taber, Equipp**).
- Modernized legacy codebases to React, cutting maintenance time by **40%** and reducing load time by **30%**.
- Built reusable component libraries in Storybook, accelerating UI development by up to **30%**.
- Drove accessibility and performance improvements, boosting Lighthouse scores and increasing user engagement.

## Skills

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frameworks/Libraries:** ReactJs, NextJs, Redux, Saga, Tailwind, MaterialUI, Jest, RTL, Storybook

**Others:** Router, REST APIs, Git, GitHub, Webpack, Vite, Yarn, React Hooks, Axios, OOP, Figma, Responsive Design, Cross-Browser Compatibility, Agile Methodology, CI/CD, Accessibility (WCAG)

## Experience

**Frontend Developer**, Intangles Lab – Pune, MH Feb 2024 – Present

Increased user engagement by 20% through a UI revamp focused on accessible design and enhanced load times, achieving a 30% improvement via lazy loading. Transitioned legacy features from Angular to React, resulting in better performance and compatibility. Developed a reusable component library in Storybook, integrated REST and GraphQL APIs, and conducted reviews of over 30 pull requests weekly as part of the code review cycle to minimize bugs and maintain responsive cross-browser support.

**Frontend Developer**, Seventh Triangle Consulting Pvt Ltd. – Noida, UP Oct 2022 – Feb 2024

Led frontend development for 3 e-commerce platforms, boosting user engagement by 15–20% with responsive, high-performance UIs. Managed a team of 2–3 developers, ensuring timely delivery and quality. Mentored junior developers and created standardized technical documentation, improving team efficiency and accessibility scores significantly.

## Projects

**Inroute Platform – Vehicle Health Dashboard:** Developed customer-facing features from scratch, including a Vehicle Health Dashboard with real-time parameters, predictive alerts, DTC codes, maps, tracking, and historical charts. Built a design system and reusable Storybook components, improving developer productivity and cutting feature development time by 30%. Collaborated with product and design teams to deliver accessible interfaces.

**Tools Used:** React, TypeScript, Storybook, MaterialUI

**V-Guard E-Commerce Platform Revamp :** Led the complete frontend revamp of V-Guard’s e-commerce platform, delivering a responsive, high-performance UI with a 15–20% boost in engagement. Ensured code quality, on-time delivery through close stakeholder collaboration. Improved Lighthouse scores from 48 to 91.

**Tools Used:** HTML5, CSS3, JavaScript, Shopify

**Code Management Internal Dashboard:** Built an internal dashboard to track, update, and edit FOTA releases for lakhs of vehicles, migrating features from Angular to React for better performance and compatibility.

**Tools Used:** React.js, Redux Toolkit, Redux Saga, Material UI

## Education

**University of Delhi**, Bachelor of Science Aug 2018 – May 2021
